BEYOND RARE™

The ancient story of Argyle pink diamonds begins in the heart of Western Australia's remote East Kimberley region, where a hidden treasure lay for over a billion years. The discovery of diamonds glinting in an anthill changed the course of history, throwing open a jewel box of kaleidoscopic colours unlike anything the world had ever seen.

For more than three decades the Argyle Diamond Mine has unearthed a spectrum of coloured diamonds, from pale blush through to vivid pink, cornflower blue, potent violet and sumptuous red.

Although the Argyle Diamond Mine is the world's virtual sole source of pink diamonds, astonishingly less than one percent of diamonds from the mine are pink.
